ABOUT US

OneAfricanChild Foundation for Creative Learning (OAC) is a youth-led nonprofit organization established to equip children and young people with the knowledge, skills, and opportunities they need to thrive in school, work, and life. We believe education should prepare learners not only for academic success, but also to become resilient leaders, active citizens, and changemakers within their communities.

Our work was born out of a growing recognition that many education systems across Africa do not consistently equip young people with the practical competencies needed to navigate an increasingly interconnected and rapidly changing world.

We work primarily with children and young people aged 5-18 in underserved communities, partnering with schools, educators, parents, and community leaders to ensure every learner has access to meaningful, future-ready education. Through this collaborative approach, we bridge the gap between classroom learning and real-world challenges, helping learners develop the confidence, values, and practical skills needed to succeed.

Our learning model combines experiential learning with Global Citizenship Education (GCED), social and emotional learning, digital citizenship, and leadership development to create engaging, learner-centered environments where curiosity, creativity, critical thinking, and civic responsibility can flourish. We encourage learners to apply their knowledge through collaboration, community action, and problem-solving, empowering them to become active contributors to their communities.

OUR MISSION & VALUES

Mission: Giving children the wings to fly through experiential learning programs centered on global citizenship education.

Vision: A future where every African child has the knowledge, confidence, and opportunity to thrive.

Values: Integrity. Innovation. Inclusion. Collaboration. Resilience

OUR CORE AREAS

RESILIENCE EDUCATION

Building emotional resilience, leadership and life skills.

DIGITAL CITIZENSHIP

Preparing young people to safely and responsibly navigate the digital world.

KNOWLEDGE DEVELOPMENT

Generating research, evidence and learning resources that improve education.

OUR APPROACH

- **Experiential Learning:** We make learning practical, engaging, and learner-centered through hands-on experiences that encourage children and young people to explore, create, collaborate, and apply their knowledge to real-world challenges.
- **Youth Engagement:** We believe young people are not just beneficiaries of development but active partners in creating it. We empower them as facilitators, peer mentors, advocates, and changemakers who lead positive change in their schools and communities.
- **Community Development:** We work alongside schools, educators, parents, and community leaders to design locally relevant solutions, recognizing that sustainable development is only possible when communities are actively involved in the learning process.

BE PART OF THE CHANGE

Transforming education is a marathon, not a sprint. We believe creating lasting change requires collaboration, commitment, and collective action. At OneAfricanChild Foundation, we work alongside schools, educators, community leaders, development partners, and other stakeholders who share our vision of a world where every child has the opportunity to learn, grow, and reach their full potential.

Through these partnerships, we are able to expand access to meaningful learning experiences, strengthen communities, and foster a generation of resilient, creative, and engaged young leaders who will shape the future. Whether you are interested in partnering with us, volunteering your time and skills, or supporting our mission through a donation, we would love to hear from you.
